

PORTSMOUTH INTERNATIONAL PORT CHA/SHA INCIDENT INVESTIGATION PROCEDURE

The below flow diagram represents the framework for incident investigation within the PIP CHA / SHA areas.

It provides an aide memoir to the Harbour Master and his deputies, when conducting an investiagtion of an incident.

It should be noted that investigations, and reports will be scaled according to the size and the outcome of the incident. i.e. a small incident with no injured parties or assets will not attract a large report, and would likely just be summarised in the Members Information Service (MIS).
